PROFESSIONAL SUMMARY

Senior IT Administrator with enterprise experience across the UAE, KSA and Singapore. I run hybrid Entra ID and Intune environments, and I am building AI-driven automation with n8n and Claude to make IT support faster and safer.

My core expertise spans Windows Server, Active Directory, Microsoft 365 and Exchange hybrid environments, Azure, and modern device management with Intune, backed by hands-on work in hybrid Entra ID architectures.

I am expanding into AI-driven automation, using n8n and Claude to streamline IT workflows, reduce manual overhead, and build smarter helpdesk and support systems. Combining traditional infrastructure strength with automation and AI is where I see enterprise IT heading.

KEY STRENGTHS

- Enterprise vision: aligning IT infrastructure, security and support with business goals
- Hybrid identity and endpoint: Entra ID, Intune, Conditional Access, Autopilot
- Generative AI and Claude workloads: running AI workloads and driving organisation-wide AI adoption for up to 20x faster work
- Automation: n8n and Claude workflows for ticket triage, onboarding and self-service
- 360° coverage: identity, endpoints, cloud, network security, backup and ITSM
